

Traffic Delineator Post with Reflective Bands

Equicross ... a leading provider of quality safety, crowd, and traffic control equipment

Designed for maximum visibility, quick setup and low maintenance, this 45" tall delineator post features a 'flare-bottom' design with one-inch wide right angle flare to insure positive locking of post and base. Heavy duty 16.6" delineator base is made from high quality rubber and weighs 15.5 lbs. Post features a convenient T-top carry handle, two high intensity reflective bands, and molded-in bolt hole for mounting a flashing light, wrapping line tape, or attaching chain. Base features a molded lower hand-hold grip. Tested and certified to meet the crash worthy requirements of NCHRP-350.

Delineator posts are rigid weatherproof plastic posts that can be arranged in a line to close a road or path to vehicles. Delineator posts can be mounted near enough to each other that they block ordinary cars, but wide enough to permit special-purpose vehicles. Great for airports, traffic control, construction, and poor weather conditions.

Specifications:

- Material:** Plastic
- Weight:** 17 lbs
- Height:** 45"
- Base Width:** 16.6"
- Base Weight:** 15.5 lbs
- Reflective Marking:** Two High Intensity Reflective Bands
- Post Diameter:** 4"

Features and Benefits:

- > heavy duty 16.6" base with molded lower hand-hold grip
- > meets NCHRP-350 standard
